TRICK OR TREAT JAR

Materials needed:

Glow-in-the-dark Cernit (79 470 24)
Cernit Roller (79 999 02)
Cernit Flexible Blade (79 999 03)
Cernit Tools (79 999 06)
Efco Roller set (18 301 02)
Glass Jar
Ceramic Tile for baking
Oven & Oven Thermometer
Optional: Ghost template & Scissors
(Efco product codes in brackets)

1 Optional: Print out the template and cut out the ghosts. (Enlarge or reduce it as necessary.)

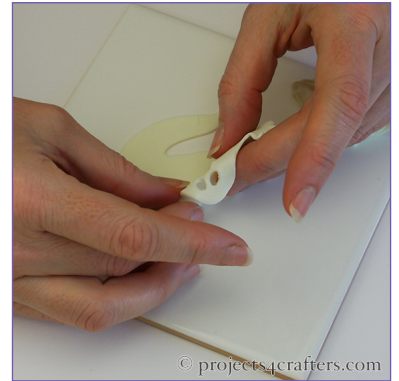

2 Condition 2-3 strips of Cernit before rolling it out on a tile using the thicker pair of clay depth guides from the Roller Set.

3 Lay one of the ghost templates on top of the clay and use the flexible blade to cut it out.

4 Use the small spatula tool to remove the clay for the eyes & mouth.

5 Carefully lift the ghost off the tile so as not to distort it too much.

6 Lay it on the glass jar, gently pressing it to adhere it. Use the Cernit tools to smooth and clean the edges as necessary.

7 Cut out more ghosts, adding them to the jar, making sure they all connect at points.

8 When you have a ring of ghosts around your jar you can bake it according to the manufacturer's instructions. (Pre-heat your oven & always use an oven thermometer.)
